ACIS announces new Director of Communications

Julie Frampton to join ACIS's growing team February 14

Raleigh, Nc., February 17, 2022—A Cure in Sight Ocular Melanoma, today announced that they have expanded their Non-Profit foundation by hiring a Director of Communications. Julie Frampton has joined that role. Julie will be the point of contact across multiple communication avenues.

Frampton has spent the last decade advocating for cancer patients and fundraising to find a cure for Melanoma, of which she is a patient. Her dedication and commitment to those in the cancer world makes her an asset in her new role. She brings with her a knowledge of communication skills and public relations that will further the mission of ACIS.

She has volunteered at other foundations such as Aim at Melanoma and Children's Neuroblastoma Cancer Foundation, where she fundraised and implemented event planning. She served on the 20201 Congressionally Directed Medical Research Program helping to determine where 30 million research dollars would be allocated, and has spearheaded many different initiatives for the Melanoma community. "I am so excited to take my skills and

knowledge and apply them to the Ocular Melanoma community. I'll be bringing with me my communication, networking, and advocacy skills to help ACIS bring awareness and fundraising for research to the forefront.

"We are excited to have Julie bring her experience as a melanoma advocate, patient and community activist to lead our communications department. Julie will be a huge asset to A Cure In Sight and the ocular melanoma community" stated CEO and President Melody Burchett. Suzanne Lescure of the Board of Directors added that she was " So excited to have Julie join our team".

A Cure in Sight is a non-profit foundation for ocular melanoma. Founded in 2013 by Melody Burchett, their focus is to provide patient support for those effected with and their families with ocular melanoma, and to raise funds for research. The are members of the Melanoma Action Coalition and Society for Nonprofits. The are sponsored by CASTLE BIOSCIENCES, North Carolina Center for Nonprofits and NORD.
